

**Carsten Jürgens (Ed.):
Remote Sensing -
New Challenges of High Resolution**

**Proceedings of the
EARSeL Joint Workshop Bochum (Germany),
March 5-7, 2008**

jointly organized by EARSeL SIG's
SIG Urban Remote Sensing
SIG 3D Remote Sensing
SIG Developing Countries
SIG Radar

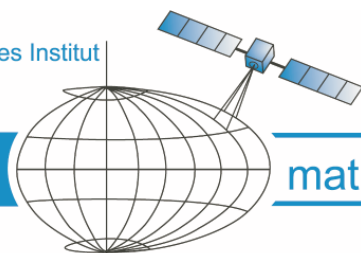

ISBN 978-3-925143-79-3

INDEX

KEYNOTE SPEAKER

- Improving the Performance of Urban Planning and Management with Remote Sensing Systems; *Richard Sliuzas* 1

SESSION A

3D Remote Sensing

- Orientation of Cartosat-1 Stereo Imagery; *Mattia Crespi, Francesca Fratarcangeli, Francesca Giannone, Karsten Jacobsen, Francesca Pieralice* 14
- A new strategy for rational polynomial coefficient generation; *Michel Bianconi, Mattia Crespi, Francesca Fratarcangeli, Francesca Giannone, Francesca Pieralice* 21
- Geometric characteristics of digital frame cameras; *Volker Spreckels, Andreas Schlienkamp, Karsten Jacobsen* 29
- DEM generation with Cartosat-1 Stereo Imagery; *Karsten Jacobsen, Mattia Crespi, Francesca Fratarcangeli, Francesca Giannone* 40

SESSION C

Developing Countries

- A satellite based deforestation assessment for the Pacific island state of Vanuato; *Martin Herold, Jacqueline Sambale, Sean Weaver, Rexon Viranamanga, Robert Eckardt* 48
- Structural image classification for oil spill contamination mapping in west Siberia using QuickBird data; *Sören Hese, Christiane Schmullius* 58
- Dumps and landfill monitoring using high-resolution satellite images; *Mikhail V. Aristov* 70
- Risk and vulnerability assessment to tsunami hazard using very high resolution satellite data – The case study of Padang, Indonesia; *Hannes Taubenböck, Joachim Post, Achim Roth, Febrin A. Ismail, Günter Strunz, Stefan Dech* 77

SESSION B

Urban Remote Sensing

- Urban LULC and structure extraction for the City of Beijing, China; *Matthias S. Möller, Thomas Blaschke* 87
- A potential of hyperspectral remote sensing for characterisation of urban structure in Munich; *Wieke Heldens, Thomas Esch, Uta Heiden, Stefan Dech* 94

SESSION D

Developing Countries

- Mapping from space for developing countries; *Karsten Jacobsen, Gürcan Büyüksalih, I. Baz* 104

Analysis of Settlement Structures by Means of High-resolution Satellite Imagery in the Megaurban Region of the Pearl River Delta in South China; <i>Birgit Kleinschmit, Bodo Coenradie</i>	115
Remote Sensing as a Tool in Generating statistics for Better Decision Making to Demographic purposes. State of the Art an Outlook; <i>Alex Mengue Mbom, Denise Sandrine, Enimelie Ndiomo</i>	116
Bio-Geo Database for Ecological Modeling of Himalayas using high Resolution Satellite Data; <i>Thapa Rajender, Sood Ravinder Kumar</i>	117

SESSION F

Urban Remote Sensing

Evaluation of Urban Heat Island in Istanbul through Remote Sensing Techniques; <i>Umut Gul Basar, Sinasi Kaya, M. Karaca</i>	128
Estimation and phenological monitoring of urban pioneer vegetation based on hyperspectral remote sensing; <i>Andr�s Jung, Christian G�tze, Cornelia Gl�ber</i>	129
Registration of 2D Free-form curves extracted from High Resolution Satellite Imagery using Iterative Closest Point Algorithm; <i>Dimitra Vassilaki, Charalabos Ioannidis, Athanasios Stamos</i>	141

SESSION K

Developing Countries

Multi-sensoral analysis of urban trajectories in the megacity of Dhaka, Bangladesh; <i>Patrick Griffiths, Sebastian van der Linden, Bj�rn Waske, Oliver Gruebner, Patrick Hostert</i>	153
Analysing the spatial heterogeneity of poverty using remote sensing: Typologie of poverty areas using selected RS based indicators; <i>Richard Sliuzas, Monika Kuffer</i>	158
Improvement in some methodological aspects for a suitable production of a spatio-temporal demographic information for sustainable development of African cities; <i>Alex Mengue Mbom, Denise Sandrine, Enimelie Ndiomo</i>	168

SESSION G

Radar Remote Sensing

Data fusion for Urban Remote Sensing: Examples from LIDAR and SAR Data; <i>Fabio Dell'Acqua, Paolo Gamba</i>	169
Feature Extraction and Change Detection for Bridges over Water in Airborne and Spaceborne SAR Image Data; <i>Erich Cadario, Karsten Schulz, Hermann Gross, Horst Hammer, Antja Thiele, Ulrich Thoennesen, Dan J. Weydahl, Uwe Soergel</i>	177
Height estimation of man made structures using hybrid VHR optical and SAR imagery; <i>Dominik Brunner, Guido Lemoine, Lorenz Bruzzone</i>	186
Registration of SAR and optical images containing bridges over land; <i>Jan Dirk Wegner, Uwe Soergel</i>	194

SESSION I

3D Remote Sensing

- Combination of satellite-derived raster and vector data for 3D city modelling; *Dennis Devriendt, Rudi Goosens, Tharwat K. Ghabour* 202
- Investigation of the potential of multispectral VHR satellite imagery for the production of 3D models of complex urban areas; *Frederik Tack, Rudi Goosens, Dennis Devriendt, Gürcan Büyüksalih* 210
- Determination of the build up area development in the Greater Municipality of Istanbul by space images; *Gürcan Büyüksalih, Karsten Jacobsen, I. Baz* 218

SESSION G

Radar Remote Sensing

- TerraSar-X SAR Data Processing Results from Commissioning and Early Operational Phase; *Birgit Schättler, Thomas Fritz, Helko Breit, Nico Adam, Ulrich Balss, Marie Lachaise, Michael Eineder, Andreas Niedermeier* 226
- Object-oriented Detection of Settlement areas from Terra SAR-X Data; *Michael Thiel, Thomas Esch, Stefan Dech* 242
- Image fusion of high resolution TerraSAR-X and multispectral electro-optical data for improved spatial resolution; *Sascha Klonus, Pablo Rosso, Manfred Ehlers* 249

SESSION E

Urban Remote Sensing

- High resolution airborne scanner data for multitemporal sealing maps of Graez – And their applicability in town planning; *Wolfgang Sulzer, Katharina Kern* 265
- Analysis of spatial and temporal changes of the urban environment using multi- and hyperspectral data; *László Mucsi, Zalán Tobak, Boudewijn van Leeuwen, Ferenc Kovács, József Szatmári* 275
- A Software tool for object-based image analysis and the evaluation of its segmentation capabilities; *Markus Reinhold, Peter Selsam, Evelin Matejka* 287

SESSION J

3D Remote Sensing

- A strategy for detection and measurement of the cliff retreat in the coast of Algave (Portugal); *Paula Redweik, Fernando Marques, Rita Matildes* 298
- High resolution imagery from early corona missions – An attractive data source for the assessment of settlement dynamics?; *Stephan Seeling, S. Borens, T. Funkenberg, S. Hubert, C. Dach* 311

SESSION L

Developing Countries

- Studying and modelling of degradation of soils on the territory of Ukraine using remote sensing and GIS technologies; *Mikhail V. Aristov* 312

Predicting and preventing urban malaria in Sub-Saharan Africa: Why not Google Earth? – 317
An example with the GeoMediS Cameroon Project; *Roland Ngom, Alexander Siegmund*

LIST OF AUTHORS

Adam, N.: TerraSar-X SAR Data Processing Results from Commissioning and Early Operational Phase	226
Aristov, M. V.: Dumps and landfull monitoring using high-resolution satellite images	70
Aristov, M. V.: Studying and modelling of degradation of soils on the territory of Ukraine using remote sensing and GIS technologies	312
Balss, U.: TerraSar-X SAR Data Processing Results from Commissioning and Early Operational Phase	226
Basar, U. G.: Evaluation of Urban Heat Island in Istanbul through Remote Sensing Techniques	128
Baz, I.: Mapping from space for developing countries	104
Baz, I.: Determination of the build up area development in the Greater Municipality of Istanbul by space images	218
Bianconi, M.: A new strategy for rational polynomial coefficient generation	21
Blaschke, T.: Urban LULC and structure extraction for the City of Beijing, China	87
Borens, S.: High resolution imagery from early corona missions – An attractive data source for the assessment of settlement dynamics?	311
Breit, H.: TerraSar-X SAR Data Processing Results from Commissioning and Early Operational Phase	226
Brunner, D.: Height estimation of man made structures using hybrid VHR optical and SAR imagery	186
Bruzzones, L.: Height estimation of man made structures using hybrid VHR optical and SAR imagery	186
Büyüksalih, G.: Mapping from space for developing countries	104
Büyüksalih, G.: Investigation of the potential of multiscope VHR satellite imagery for the production of 3D models of complex urban areas	210
Büyüksalih, G.: Determination of the build up area development in the Greater Municipality of Istanbul by space images	218
Cadario, E.: Feature Extraction and Change Detection for Bridges over Water in Airborne and Spaceborne SAR Image Data	177
